

An intelligent, ultra high-output marker light with a simple yet elegant design. that allows for easy and rapid installation. The plug and play electrical connections enhance the quick and easy installation process by preventing incorrect connections. Leader cables of up to 164 ft (50 m) give greater flexibility during installation as power supplies and control equipment can be housed well away from the luminaires. High-quality LEDs achieve high-intensity beautiful, rich and vibrant colors. From highlighting architectural elements to super-smooth crossfades and color flows.

Specification Matrix

Network Topology - PowerSync™ Low Voltage

- T Terminator**
Use PowerSync™ terminator, supplied with leader cable to terminate last luminaire in chain.
- I Maximum Current**
Maximum current through cables and connectors supplied by Lumascope:
≤12.8 A – Installations in North American Market (UL, ETL)
≤16 A – Installations in International Market (CE, CCC)
- Connection Type**
Circuits can be configured as either connectorized or hardwired. For details refer to installation instructions and comply with local electrical codes.

Up to 20 luminaires per 48 V PowerSync™ circuit / LS6550 Low Voltage PowerSync™ Data Injector

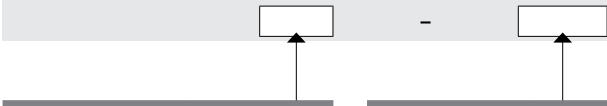

Maximum Circuit Loading - Single Run						
LED Power	Max Leader Cable Length from LS6550 to first fitting	Maximum number of luminaires per 48V Power Supply				
		120 W	240 W	320 W	480 W	600 W
20 W	50 ft / 15 m	4	9	12	17	20
	98 ft / 30 m	4	9	11	16	18
	164 ft / 50 m	4	8	10	14	15

Values in the above table show the maximum circuit loading per 48V circuit. Values are based on 1.2 m (4.0 ft) spacing. Smaller spacing may effect the circuit loading. Extended fixture cables, inclusion of jumper cables, or longer leader cable will effect loading. Circuits can be made up of up to 20 fixtures, up to the maximum circuit loading in the table above. Circuits are limited to maximum 12.8A. For non-continuous runs, contact Lumascope for details.

PowerSync™ Connectorized Accessories

Low Voltage PowerSync™ Data Injector

Translates control signals into a digital format, delivering integral power and data to intelligent LED luminaires. This allows highly-granular addressing and high-speed digital control of every luminaire, using only three wires. The data injector is DIN rail mountable designed to be installed in a switchboard, next to the power supply and circuit breaker that is supplying power to the controlled lighting circuit.

Note:
PowerSync™ Data Injector ships with three (3) hardwired PowerSync terminators and one (1) hardwired DMX terminator.
